Daily Cost

Communication 15

Reduce the chance of high demand

Chance

Days

90% chance of normal demand

Solution

\$70901.46

Expected Total Cost

\$2500+

Cost Saving

Daily Electricity Order

Measure Names

- High
- Normal

Reduction days based on surplus electricity storage

Blue: reduction day only for normal demand

Green: reduction day only for high demand

Red: reduction day for both normal & high demand

Note: 5 days for each demand storage in June

Communication 16

If high demand for previous day

If normal demand for previous day

10% high demand chance for 5 days still works,
regardless whether it is high or normal demand the previous day

Solution

\$65601.65

Expected Total Cost

\$5300

Cost Saving

111 MWH

Initial Order

Battery Size vs. Total Cost

Thanks!
